Tough course! The lactic acid produced on the early climbs stays with you for the remainder of the 15.5 miles& and the downhills can pound the quads as well as leave you with black toes. But those that have run both say that the Boston Primer is harder!! Great day, lots of sun in our face and the wind was at our back most of the way. Stan Bickford bettered the late Bruce Ellis' 1988 course record by over a minute. TAC certified.
